# SANKET BHUITE

+91 9022394903 | work.sanketbhuite@outlook.com | LinkedIn | GitHub | Portfolio

## PROFESSIONAL SUMMARY

Results-driven B.Sc. Computer Science student (2026) and National-Level Programming Competition winner with demonstrated expertise in full-stack development, Python automation, and data analytics. Proven ability to deliver production-ready applications using React.js, Spring Boot, and REST APIs. Actively seeking analytics and development opportunities to leverage hands-on technical skills in a high-impact environment.

## TECHNICAL SKILLS

**Languages :** Python, Java, C, C++, .NET, JavaScript, SQL, PHP

**Frameworks & Libraries :** Spring Boot, Flask, Django, Bootstrap CSS, React.js, Next.js, Plasmo.js

**Tools:** Git, Linux, REST APIs, MySQL, Power B, MS Excel, Docker

**Cloud:** Microsoft Azure (VMs, Storage, Networking), Google Cloud, AWS

## EXPERIENCE

**Python Development Intern** | *CODTECH IT SOLUTIONS*

- Engineered Python-based automation scripts and backend applications, reducing manual processing time and improving system efficiency.
- Collaborated within an Agile development team to architect scalable solutions, optimizing code performance and maintainability.
- Delivered production-ready modules on schedule, consistently meeting project milestones and quality benchmarks.

**Data Analytics & Visualization Virtual Participant** | *Accenture North America (via Forage)*

- Executed end-to-end data analytics project simulating real-world client deliverables, including data cleaning, analysis, and storytelling.
- Designed compelling data visualizations and insights presentations aligned with industry best practices, receiving positive evaluator feedback.

## PROJECTS

**PlacementPrep – Full-Stack Placement Management Platform** *| React.js, Spring Boot, SQL, REST APIs, Bootstrap*

- Architected and deployed a comprehensive placement preparation web application supporting announcements, curated practice resources, and real-time student progress tracking.
- Designed RESTful API architecture with Java/Spring Boot backend and responsive React.js frontend, ensuring seamless cross-device user experience.

**TalkMate – AI-Powered Conversational Chat Application** *| Flask, API integration*

- Built an interactive chat application leveraging third-party AI APIs to deliver dynamic, context-aware conversational responses for English proficiency enhancement.
- Implemented a clean, intuitive UI with optimized API call handling, achieving smooth real-time interaction and low-latency response delivery.

**AES-GCM Image Encryption & Decryption Tool** *| Java, Cryptography, Swing*

- A modern Windows desktop application built using Java Swing that allows users to securely encrypt and decrypt image files using AES-GCM, an industry-standard encryption algorithm.

## CERTIFICATIONS

- **Microsoft :** Azure Fundamentals (AZ-900)
- **Anthropic :** Claude 101
- **AWS :** Introduction to generative AI
- **Microsoft and LinkedIn :** Career Essentials in Cybersecurity
- **Mastercard :** Cybersecurity job simulation
- **Google Cloud(simpli Learn) :** Trust and security with google cloud

## EDUCATION

**B.Sc. Computer Science** 2023 – 2026

*Punyashlok Ahilyadevi Holkar Solapur University, Solapur*

**Higher Secondary Certificate (12th Grade)** 2022 – 2023

*Sangola Vidyamandir Jr. College, Sangola*
