PROFESSIONAL SUMMARY

Results-driven B.Sc. Computer Science student (2026) and National-Level Programming Competition winner with demonstrated expertise in full-stack development, Python automation, and data analytics. Actively seeking analytics and development opportunities to leverage hands-on technical skills in a high-impact environment.

TECHNICAL SKILLS

Languages : Python, Java, C, C++, .NET, JavaScript, SQL, PHP

Frameworks & Libraries : Spring Boot, Flask, Django, Bootstrap CSS, React.js, Next.js, Plasm.js

Tools: Git, Linux, REST APIs, MySQL, Power BI, MS Excel, Docker

Cloud: Microsoft Azure (VMs, Storage, Networking), Google Cloud, AWS

EXPERIENCE

Python Development Intern | *CODTECH IT SOLUTIONS*

- Engineered Python-based automation scripts and backend applications, reducing manual processing time and improving system efficiency.
- Collaborated within an Agile development team to architect scalable solutions, optimizing code performance and maintainability.
- Delivered production-ready modules on schedule, consistently meeting project milestones and quality benchmarks.

Data Analytics & Visualization Virtual Participant | *Accenture North America (via Forage)*

- Executed end-to-end data analytics project simulating real-world client deliverables, including data cleaning, analysis, and storytelling.
- Designed compelling data visualizations and insights presentations aligned with industry best practices, receiving positive evaluator feedback.

PROJECTS

PlacementPrep – Full-Stack Placement Management Platform | *React.js, Spring Boot, SQL, REST APIs, Bootstrap*

- Architected and deployed a comprehensive placement preparation web application supporting announcements, curated practice resources, and real-time student progress tracking.
- Designed RESTful API architecture with Java/Spring Boot backend and responsive React.js frontend, ensuring seamless cross-device user experience.

TalkMate – AI-Powered Conversational Chat Application | *Flask, API integration*

- Built an interactive chat application leveraging third-party AI APIs to deliver dynamic, context-aware conversational responses for English proficiency enhancement.
- Implemented a clean, intuitive UI with optimized API call handling, achieving smooth real-time interaction and low-latency response delivery.

AES-GCM Image Encryption & Decryption Tool | *Java, Cryptography, Swing*

- A modern Windows desktop application built using Java Swing that allows users to securely encrypt and decrypt image files using AES-GCM, an industry-standard encryption algorithm.

CERTIFICATIONS

- Microsoft :** Azure Fundamentals (AZ-900)
- Anthropic :** Claude 101
- AWS :** Introduction to generative AI
- Microsoft and LinkedIn :** Career Essentials in Cybersecurity
- Mastercard :** Cybersecurity job simulation
- Google Cloud(simpli Learn) :** Trust and security with google cloud

EDUCATION

B.Sc. Computer Science

2023 – 2026

Punyashlok Ahilyadevi Holkar Solapur University, Solapur

Higher Secondary Certificate (12th Grade)

2022 – 2023

Sangola Vidyamandir Jr. College, Sangola
